

FIG. 1 A block diagram of an overall chlorine dioxide gas treatment system including chlorine dioxide gas generation, sterilization, and recycling system

- |   |  |
|---|--|
| 1 – Food Storage or transportation container  | 2 – Gas on-line fan or pump                  |
| 3 – Chlorine dioxide gas generator  | 4 – air filter                               |
| 5 – Chlorine dioxide gas dissolving tank  | 6 – Chlorine dioxide gas neutralizing column |
| 7 – Chlorine dioxide gas concentration, temperature, pressure, and relative humidity monitor system |  |
| 8 – Pump for chlorine dioxide solution  |  |

FIG. 2 A block diagram of an overall chlorine dioxide gas treatment system including gas generation from aqueous chlorine dioxide, sterilization, and recycling system

- |   |  |
|---|--|
| 1 – Food Storage or transportation container  | 2 – gas on-line fan or pump                  |
| 3' – Chlorine dioxide gas generation tank   | 4 – air filter                               |
| 5 – Chlorine dioxide gas dissolving tank  | 6 – Chlorine dioxide gas neutralizing column |
| 7 – Chlorine dioxide gas concentration, temperature, pressure, and relative humidity monitor system |  |
| 8 – Pump for chlorine dioxide solution  |  |

FIG. 3 A block diagram of an overall chlorine dioxide gas treatment system including chlorine dioxide gas generation from aqueous chlorine dioxide, sterilization, and recycling system

- |   |  |
|---|--|
| 1 – Food Storage or transportation container  | 2' – low pressure gas pump                   |
| 3' – Dispenser for chlorine dioxide gas generation  | 4 – air filter                               |
| 5 – Chlorine dioxide gas dissolving tank  | 6 – Chlorine dioxide gas neutralizing column |
| 7 – Chlorine dioxide gas concentration, temperature, pressure, and relative humidity monitor system |  |
| 8 – Pump for chlorine dioxide solution,   |  |
| 9 – Sterile water or chlorine dioxide solution spray head   |  |
